

Product SPECIFICATION SHEET

EL2003

Description

The Extreme LED Mining Cap Lamp is a portable and cordless led rechargeable mining cap lamp, small, compact and perfect for any mining industry. Best mining headlamps South Africa. Huge improvement from, but also inspired by the first mining headlamps.

It has a 1W high-powered Led. It has two sets of light sources, the first is the main-auxiliary, the second light source is the auxiliary light source, which acts as the backup light when the first light source malfunctions.

We supply Mining Cap Lamps to the mining industry country wide. For bulk orders enquire about wholesale pricing.

KEY FEATURES

LED

The products life is more than 50000 hours. With an illuminance of 150Lumen and a beam distance of 80M. This mining headlamp is specifically for mining and industrial use only.

Battery (Lithium-ion)

The battery has an over-charging, over-discharging and a short circuit protection function. Every battery cycled lifetime is more than 600 times. The head unit has a built in battery so these cap lamps don't have a separate battery pack that attaches to the belt. The battery is built into the head unit.

Charger - INCLUDED

Normal charging voltage is 4.2V. The indicator light on the charger will display green in colour, when the battery is fully charged.
