

General

As the main switch in the combination of electrical terminal apparatus, GYH8 isolator is suitable for circuit of 50/60Hz, rated voltage 230V/400V, rated current up to 125A for iso-lating, it also can be used for infrequent on-and-off circuit, and is widely used in industry, mine, high-building, commerce and household and so on.

- In compliance with IEC/EN60947-3
- With indicator function in the contact position.
- Transparent cover designed to carry label
- Bilateral busbar wiring capabilities to adapt to the wider use of premises.
- Maximum connecting ability of 50mm², wiring torque 4N·m, applicable to a variety of installing configurations, wiring stronger
